PROJECTS

Blog Templates

https://rahulkumar9471.github.io/Webkledges/

The React blog template features a home page showcasing an overview of blog content, including featured posts to captivate visitors. The category page organizes posts into topics for easy navigation, allowing users to explore specific interests conveniently. Blog details pages offer in-depth information about individual posts. The sign-in and sign-up pages. Implemented with HTML, Tailwind CSS, and React JS, the template ensures a visually appealing and responsive design. Leveraging the Blogger API enables dynamic content retrieval.

Educationtoday

https://educationtoday.co/

educationtoday is a user-friendly system facilitating communication between administrators, schools, and parents. Using technology HTML, CSS, JavaScript, Bootstrap, jQuery, and XML for the frontend, PHP for the backend, and MySQLi for the

database. The admin manages parents and schools, while schools and parents benefit from features like profile management, admission announcements, lead tracking, and reviews.

Dealpax

https://dealpax.com/

dealpax is a user-friendly system that helps businesses manage appointments seamlessly. It has a simple and attractive interface for users, merchants, and administrators. Admins can oversee users and merchants, track business metrics, and manage various aspects. Merchants benefit from features like profile management, creating outlets, blogging, and issuing discount coupons. Users can easily schedule, reschedule, and cancel appointments, manage availability, payment and share reviews. The system uses HTML, CSS, JavaScript, Bootstrap, jQuery, XML for the frontend, PHP for the backend, and MySQLi for the database.
